SUMMARY

Front End Engineer with **eight years** of experience across
SaaS, **e-commerce**, government
platforms, and **e-learning systems**. Graphic Design degree
brings strong visual design sensibility to technical implementation. Focused on
TypeScript, **React**, **Next.js** with
strong **product thinking** and **autonomy**. Experienced
with **fully remote**, autonomous, and hybrid work environments using
Scrum, **Kanban** and **Shape Up**.
Expanding expertise in **full stack architecture**,
scalability, **design systems** and developer
experience tooling.

EXPERIENCE

Front End Developer · Brainstud / All You Can Learn

2025 — Present

- Building a modern e-learning platform with **Next.js**, **TypeScript** and React
  Query.
- Working under the **Shape Up** methodology delivering scoped and iterative features.
- Collaborating with a **Laravel** backend team through a custom REST layer.

Front End Developer · Pleio

2023 — 2025

- Developed fully **open source** government platforms using **React**, **GraphQL**
  and **Django**.
- Rebuilt the **FSV fraud detection** platform in **JavaScript**, **SCSS**
  and **Django**.
- Improved **reliability** and **maintainability** of a core intranet site builder used
  across government institutions.
- Implemented **WCAG AA** compliance and **accessibility** standards for
  government applications.

Software Developer · Lasaulec / Distil

2022 — 2023

- Rebuilt the complete webshop front end using **Razor**, **SCSS** and
  JavaScript.
- Delivered **production features** autonomously for **React** based internal
  applications.

Front End Developer · Tickles

2016 — 2022

- Built custom **Magento 2** webshops for **B2B** and **B2C** clients using
  PHTML, **BEM SCSS** and **JavaScript**.
